

Kids should not have A Facebook.

Do you think that kids should not have a or should they. Many things are happening on facebook.

Some kids are getting cyber bullied on facebook by people who have a facebook. Then a fight could happen and the teacher probably would not know how it started.

I have seen bad stuff on facebook and other stuff like bad pictures and stuff that kids should not see. People should not have a facebook because all of the bad things on it.

Random people have been sending me friend requests on facebook. People can message you and send you random pictures go in to your profile settings and look at them so they can't talk to you.

I don't think that kids should have a facebook because they are dangers for them so do you think that your kid should have a facebook.
