

School Essay

by Holly
Vallese

Should Cortland lengthen the school day? This is an argument that teachers in Chicago have been fighting about for the past few weeks. There are good Arguments for lengthening the school day and Good Arguments to not lengthen the school day.

Kids would want to go to school longer and some don't. Let's hear some reasons why they do. Kids would like to have more physical education, science, Social studies, and also see their friend's more in school. They want to learn more technology too.

Kids also wouldn't want to be in school longer because they would need more time to get home like they would have to walk in the dark and their parents would worry about them. Kids also would be stressed even more then they are now. Some kids wouldn't want to stay in school longer because they would want to see their family. They might want more time to do homework if the teachers had to give it out.

In Conclusion my option is we shouldn't have more school because I might want to see my sister and I need to watch my pets that are at home. I probably would be stressed if we were at school longer and if we had homework.
